SENIOR BACK END DEVELOPER

BRIEF INTRO

We are looking for a Senior Back-End Web/Mobile Developer. If you have excellent programming skills and a passion for developing applications or improving existing ones, we would like to meet you. You should be comfortable working independently as well as with a team in the design and development of mission critical websites, applications, layers of infrastructure, ensuring system consistency, and improving user experience. This specific role requires an individual who not only possesses advanced technical skills but also demonstrates leadership potential, adaptability, and a proactive approach to meet the challenges of an ongoing project nearing a critical milestone. Ultimately, you should be able to develop and maintain functional and stable web applications to meet our client's needs.

RESPONSIBILITIES

▪ Project Integration and Collaboration:

✓ Join an ongoing project near the Minimum Viable Product (MVP) deadline and seamlessly integrate into the development team.

✓ Collaborate closely with the existing team members, including front-end developers, other back-end developers, and stakeholders, to ensure alignment and integration of the app with the main system.

✓ Lead the development efforts in the subproject related to the mobile application, ensuring its seamless connectivity and functionality within the overarching system.

✓ Implement high-quality, scalable, and efficient code solutions using Golang within the microservices architecture of the backend.

▪ Code Quality and Refactoring:

✓ Maintain and elevate the existing high standards of code quality, emphasizing clean code practices, and contributing to code reviews and refactoring initiatives.

✓ Identify areas for improvement and implement necessary refactoring to enhance the performance, reliability, and maintainability of the backend codebase.

✓ Guarantee that your code pass QA/QC's acceptance rates over 90%

✓ Design robust APIs to support mobile and desktop clients

▪ Rapid Learning and Adaptation:

✓ Quickly grasp and become proficient in the current codebase, stack, and business logics, adapting to the project's specific requirements and technologies.

✓ Demonstrate a strong learning curve, swiftly acquiring domain-specific knowledge to effectively contribute to the ongoing project development.

▪ Leadership Potential:

✓ Show potential and readiness to evolve into a Lead Developer or Tech Lead role, displaying leadership qualities in guiding and mentoring junior team members, contributing to technical decisions, and providing technical direction when needed.

✓ Proactively engage in knowledge sharing, contributing insights, and best practices to the team while demonstrating a collaborative and supportive attitude.

✓ Follow emerging technologies

Reporting to: Tech Lead > Project Manager

II. REQUIREMENTS

1. Language: Vietnamese (Fluent or Native)

AND : Working Proficiency in English communication (TOEIC 700+, IELTS 5+)

2. Qualifications:

✓ Bachelor's in Computer Sciences or equivalent engineering degree

✓ Extensive experience (5+ years) as a Back-End Developer with a focus on microservices architecture, preferably using Golang.

✓ Language Mastery: Golang (2+ years) and (2 or more) JavaScript/TypeScript, C#, Python, and others

✓ Experience in writing secure web applications, Information security for APIs and databases

✓ Proficient understanding of code versioning tools, such as Git

✓ Knowledge and experiences in SQL and NoSQL (ex:Postgres/MongoDB)

✓ Proficiency in developing and integrating backend solutions for mobile applications, coupled with a solid understanding of the complexities of extensive management systems.

✓ Demonstrated ability to maintain high code quality standards, conduct refactoring activities, and deliver within tight deadlines.

✓ Strong problem-solving skills, adaptability, and a rapid learning curve in understanding complex business logics and technical architectures.

✓ Leadership potential with the capability and willingness to transition into a Lead

Developer or Tech Lead role.

✓ Excellent communication skills and a collaborative mindset to work effectively within cross-functional teams and stakeholders
